**Quantum Signal Partners Invited to Present
at Vibration Institute 25th Annual Meeting**

(ANN ARBOR, MI) -- Quantum Signal has been selected to make a presentation at the 25th Annual Meeting of the Vibration Institute in Willowbrook, IL. This meeting is a yearly event bringing together experts in the field of condition monitoring and vibration control of machines and structures. The principals of Quantum Signal, Dr. William J. Williams, Dr. Mitchell M. Rohde, and Dr. Eugene J. Zalubas, will present their paper, "Time Frequency Analysis of Vibrational Signals," in the Signal Processing I session on Friday June 22 at the Hyatt Regency Cincinnati, OH. The presentation will provide an overview of Joint Time Frequency Analysis (JTFA) and its exciting applications, including prognostic monitoring of ball bearings.

"We are pleased and honored to have been invited to speak at the Vibration Institute Annual Meeting," said Dr. Williams. "This meeting is a premier event in the machine monitoring and prognostics area, and I believe there is great potential for time-frequency analysis to open the door to great advances in the industry."

About Quantum Signal

Founded in 1999, Quantum Signal LLC is an engineering services company specializing in advanced signal processing and pragmatic algorithmic solutions for its automotive, aerospace, and biometrics clients. As a leader in this dynamic field, the Ann Arbor-based firm is transitioning exciting signal processing technologies out of the ivory tower and into a wide variety of commercial applications. For additional information on Quantum Signal, please visit our Web site at www.quantumsignal.com or call (734) 429 - 9100.

About The Vibration Institute

The Vibration Institute is a not-for-profit organization dedicated to the exchange of practical vibration information on machines and structures. The scope of the Institute's activities also includes nonintrusive condition monitoring technologies. The Institute, which was established in 1972, has more than 3,000 members, 37 chapters, and a technology division -- the Society for Machinery Failure Prevention Technology (MFPT). The Institute's program consists of an

Annual Meeting, short courses, and an internationally recognized certification program for assessing individual levels of expertise in machinery vibrations. The Institute publishes *Vibrations* magazine, Proceedings of its Annual Meetings, and Short Course Notes. They can be reached at 6262 S. Kingery Highway, Suite 212, Willowbrook, IL 60514, (630) 654-2254, vibinst@anet-chi.com.
