Quantum Signal Featured in Business Direct Weekly

(ANN ARBOR, MI) -- Quantum Signal, LLC was recently featured in Michigan's Business Direct Weekly. The two articles in the July 31-August 6, 2003 issue, written by Brian Hamilton, focused on Quantum's history and biometrics (face recognition and voice authentication) activities, and their potential impact on society. Brian also documented his experience in Quantum's "hi-tech" experimental facility in Ann Arbor. A PDF of these articles can be found by clicking [here](#) (3.68 Megs). For more detail on Quantum's current data collection experiment, please see the press release: *Quantum Signal Launches Biometrics Experiment*.

About Quantum Signal

Founded in 1999, Quantum Signal LLC is an engineering services company specializing in advanced signal processing and pragmatic algorithmic solutions for its automotive, aerospace, and biometrics clients. As a leader in this dynamic field, the Ann Arbor-based firm is transitioning exciting signal processing technologies out of the ivory tower and into a wide variety of commercial applications. For additional information on Quantum Signal or to participate in the data collection experiment, please visit our Web site at www.quantumsignal.com or call (734) 429 - 9100.
