Quantum Signal Appears at NASA/GLITeC “World of Data Management”

(ANN ARBOR, MI) – Quantum Signal brought its advanced signal processing know-how to the [NASA Glenn Research Center](#) (GRC) on October 1, 2003. The event, titled “World of Data Management,” brought together small Midwest companies with capabilities in the data management, storage, and analysis areas. Quantum presented its capabilities in algorithm development, noise and vibration analysis, prognostics, biometrics, and image processing to interested NASA Glenn staff.

The event was sponsored by the Great Lakes Industrial Technology Center ([GLITeC](#)), an organization promoting technology transfer and cooperation between the United States federal government and industry.

A flyer for the event is available by clicking [here](#) (673k).

1. About Quantum Signal

Founded in 1999, Quantum Signal LLC is an engineering services company specializing in advanced signal processing and pragmatic algorithmic solutions for its automotive, aerospace, and biometrics clients. As a leader in this dynamic field, the Ann Arbor-based firm is transitioning exciting signal processing technologies out of the ivory tower and into a wide variety of commercial applications. For additional information on Quantum Signal, please visit our Web site at www.quantumsignal.com or call (734) 429 - 9100.
